

Sprint 4 Report

Clothr, Clothr Team

December 2, 2017

Actions to Stop Doing: We tend get side tracked during meetings, and it's a reoccurring theme throughout the quarter. We have gotten better at not getting sidetracked, but it's a lot better than the beginning of the quarter.

Actions to Start Doing: We need to plan time specifically to finishing the product since it's getting near the end of the quarter and we are getting bombarded with all our other classes. We need to make sure we commit to our planning and not get off track.

Actions to Keep Doing: Considering it's getting to the end of the quarter, we should end on a high note just make sure we continue working hard.

Work Completed/Not Completed: We were able to finish the setting page with a tutorial for users. We were also able to create different tags for filters.

Work Completion Rate: We weren't able to finish constraints, so we only completed 15/36 points.
