Sprint 3 Report

Clothr, Clothr Team
November 19, 2017

Actions to Stop Doing: The team needs to learn to not get distracted whenever we have our meetings to prevent going over the 15 minute scrum meeting.

Actions to Start Doing: We need to start commenting on the code more to make it easier to read and understand. With how far we are in development, there's a lot of code put within each file and it's important to understand what the code does. Otherwise, we would be spending a lot of time explaining the functionality of things.

Actions to Keep Doing: We are pretty committed in meeting up at the same time each week. We should continue the regiment each week and continue the agile process. We also work pretty well as a creative team in the sense that we bounce ideas off each other in a productive way. Our meetings are extremely productive and we are all able to leave with a complete view with what needs to be done.

Work Completed/Not Completed: For sprint 3, we were able to add a settings page, details page, connect the users to the database, and create a details page where all the saved clothes can be displayed. The only thing we weren't able to accomplish was the filter page. Everything works and is available except for the filter page.

Work Completion Rate: Since we couldn't finish the filter page, we didn't meet the done criteria for user story one. Given that info, we only completed 13 points out of 21 points.
